WELCOME TO OUR 53rd ANNUAL SALE

VAN NEWKIRK
SINCE **U** 1892
HEREFORDS

We invite you, and your family to our 53rd annual bull and female sale - Monday, January 19th, 2026. The cattle market is changing fast. Good cattle are finally getting paid what they're worth, and if you've got the right genetics, you're sitting pretty. Feeder cattle prices are really good right now and should stay that way.

Don't wait until sale day to look at the 250 bulls - Come Saturday or Sunday, so that you have time to walk through all the bulls. The quality runs that deep.

MARBLING ISN'T OPTIONAL ANYMORE. With the Choice/Select spread where it's at, you're leaving money on the table if you're not raising marbled cattle. The entire bull offering averages in the top 15% of the breed for marbling. We've been slowly cranking those numbers up without screwing up the important stuff - fleshing ability and fertility.

EASY KEEPERS = MORE MONEY IN YOUR POCKET. With input costs through the roof, you need cattle that grow and don't need babied. Our Herefords are the long, growthy kind that make your operation more efficient. We run our cows like any good commercial guy does - as cheap as possible. They graze with zero supplement for 9 months, calves get no creep feed.

THE FEMALES IN THIS SALE ARE LEGIT. Both the straight Herefords and the F1 Baldies. Common heifers are too expensive to mess with anymore. Spend the money once on good ones that won't give you headaches.

THEY ALL LOOK ALIKE BECAUSE THEY ARE ALIKE. Flip through the catalog - you'll see they're all long-backed, long hipped, deep-ribbed, with big butts and good feet. They come from mama cows that don't need help and have good udders. That consistency means consistent calves for you.

OUR GUARANTEE'S SOLID. These bulls will work anywhere. Got problems? Call us.

We're keeping 1/4 semen interest in all sale bulls. We look forward to seeing you.

The Van Newkirk Family

LENGTH: Bottom line, you sell by the pound. The extra length of Van Newkirk bulls adds serious pounds and profits to your calves. Length helps you maintain calving ease with heavier calves.

LONGEVITY: Structural correctness and easy fleshing ability have been bred into Van Newkirk bulls since 1947. Van Newkirk bulls are working from south Texas to Canada, Virginia to California. Their easy fleshing ability and structural correctness allows them to perform well in any environment.

CONSISTENT QUALITY: It takes generations of breeding and culling for quality genetics, otherwise you end up with one hit wonders that don't breed consistently. When you walk thru a sale offering every bull should look the same-no bottom end. That's a sign of how those bulls will breed and how their calves will look. Even, consistent calves make you money. Van Newkirk bulls breed predictability. They are backed by 70+ years of quality genetics. The quality of Van Newkirk bulls runs deep, there is no bottom end. Every bull selling is raised by his natural mother in commercial cattle conditions.

DOCILITY: Easy going, quiet cattle are important. It impacts your safety, as well as your calves efficiency and rate of gain and carcass quality.

BREED LEADING CARCASS: Several sale bulls are in the top 1% of the breed for marbling. The marbling average of 250 bulls is in the top 15% of the breed. With more cattle selling on the grid; and tracking of feeder cattle, marbling matters.

BULLET-PROOF TWO YEAR OLDS: Van Newkirk two-year old bulls are ready to go to work and breed a lot of cows in any environment. They hold up well, don't fall apart, and don't require any special treatment, because they weren't overfed as yearlings.

THE COWHERD: Van Newkirk bulls breed predictability. They breed strong because of our 70+ years of using top-quality genetics. Not one hit wonders. These bulls are raised by their own mothers in realistic conditions. We have never sold off our top females. Our cows are some of the best in the breed.

YEARLING BULLS

This elite group of bull calves represents our latest and freshest genetics. Many of these calves could be used on heifers. We think you'll appreciate their length, thickness, and performance. They will not be highly fitted, but should weigh 900-1,000 lb. by sale day. Ultrasound data will be available on Facebook and our website in early January as well as sale day. These pictures were taken in November; you may want to check out their individual videos at www.VanNewkirkHerefords.com.
